

AUSTIN DREOSCH

SOFTWARE DEVELOPER

📞 707-308-9486 ✉️ austindreosch@gmail.com 📍 San Francisco Bay Area, CA

Full-stack developer with 6+ years of independent project experience coupled with a comprehensive formal education in software engineering and a bachelors degree from Sonoma State University. Expertise spanning multiple languages, toolsets and paradigms. My defining quality is an endless curiosity and passion for learning new skills, which has driven my success in my education and career. Exceptional soft-skills candidate and thoughtful communicator with a bright-spirited ambitious temperament.

EDUCATION

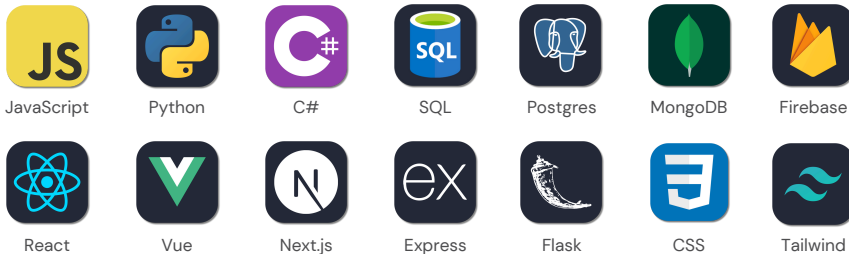

📍 **Software Engineering** 2022 – 2024
Springboard | San Francisco, CA

Intensive hands-on experience in end-to-end software development principles in multiple programming languages (JavaScript, Python, C#) with technical skills focused on full stack web applications in emerging technologies, data structures & algorithms, asynchronous dynamic programming, APIs, testing & C.S. fundamentals.

📍 **SSU Interdisciplinary Studies, Bachelors** 2017 – 2021
Sonoma State University | Rohnert Park, CA

Graduated with my Bachelors from Sonoma State in a multidisciplinary program focused on strong analytical problem-solving, communication skills, mathematics, science, and the humanities.

SKILLS

EXPERIENCE

📍 **Marketing / Design** Mar 2023 – Present
Engel & Völkers | St. Helena, CA

- Led development and design of all marketing and client presentations for top Napa real estate agent with annual sales volume exceeding \$200,000,000.
- Operated in leadership role with junior employees, interns – heading team collaboration and office management.

📍 **Workplace Coordinator** Mar 2022 – Jan 2023
CBRE | Austin, TX

- Managed all employee-facing services & communication between clients, vendors, staff in Austin for the world's largest commercial real estate firm.
- Contributed in the production and implementation of marketing assets and branded campaigns.

Portfolio

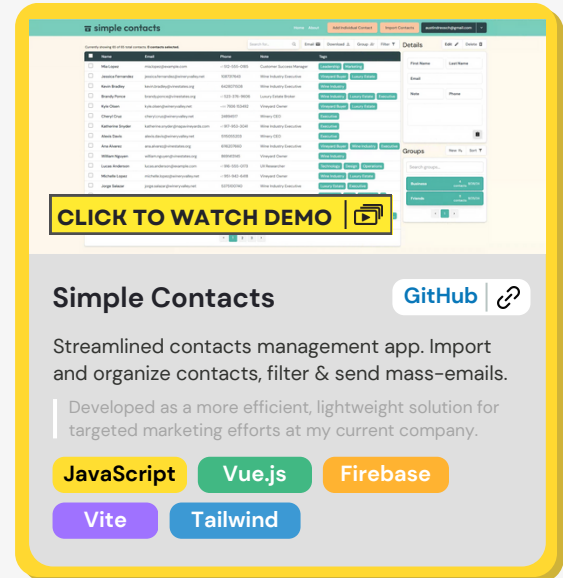

GitHub

LinkedIn

PROJECTS

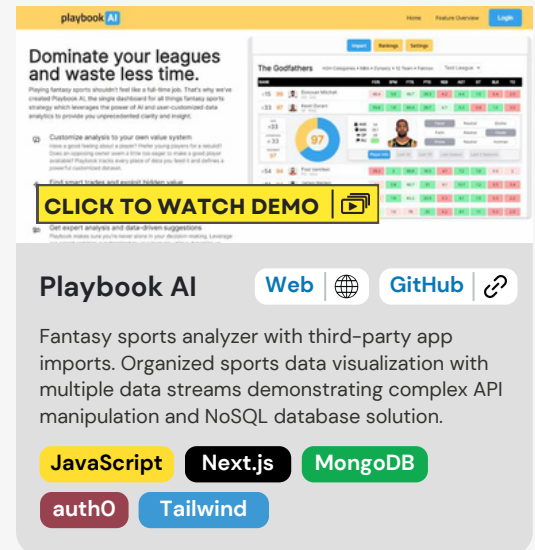

Simple Contacts

GitHub

Streamlined contacts management app. Import and organize contacts, filter & send mass-emails.

Developed as a more efficient, lightweight solution for targeted marketing efforts at my current company.

JavaScript Vue.js Firebase
Vite Tailwind

Playbook AI

Web GitHub

Fantasy sports analyzer with third-party app imports. Organized sports data visualization with multiple data streams demonstrating complex API manipulation and NoSQL database solution.

JavaScript Next.js MongoDB
auth0 Tailwind

Quillwind AI

Web GitHub

Generative AI solution for producing SEO optimized blog posts through integration with OpenAI API. SAAS web app functionality with Stripe and auth0.

JavaScript React OpenAI
MongoDB Stripe auth0

Prep Kitchen

Web GitHub

Meal delivery service app demonstrating full-stack Python development with the SQLAlchemy ORM and integration of the MealDB API.

Python Flask PostgreSQL
SQLAlchemy jQuery CSS

EXPERIENCE

Marketing / Design

Engel & Völkers | St. Helena, CA

Mar 2023 – Present

- Led development and design of all marketing and client presentations for top Napa real estate agent with annual sales volume exceeding \$200,000,000.
- Operated in a leadership role with junior employees, interns – heading team collaboration and office management.

Workplace Coordinator

CBRE | Austin, TX

Mar 2022 – Jan 2023

- Managed all employee-facing services & communication between clients, vendors, staff in Austin for the world's largest commercial real estate firm.
- Contributed in the production and implementation of marketing materials and branded campaigns.

PROJECTS

Simple Contacts - Tech: JavaScript, Vue.js, Firebase, Tailwind, Vite

Simplified contacts management app without the commonly included bulk of CRM tools. Import and organize contacts, and prompt mass-email threads. Developed as solution at current position.

Playbook AI - Tech: JavaScript, Next.js, MongoDB, auth0, Tailwind, OpenAI

Fantasy sports analyzer with external team imports. Organized sports data visualization with multiple data streams demonstrating complex API manipulation and NoSQL database solution.

Quillwind AI - Tech: JavaScript, React, OpenAI, MongoDB, Stripe, auth0

Generative AI solution for producing SEO optimized blog pieces through integration with OpenAI API. SAAS web app functionality with Stripe integration and secure user authentication with auth0.

Prep Kitchen - Tech: Python, Flask, PostgreSQL, SQLAlchemy, jQuery, CSS

Meal delivery service app demonstration full-stack Python development with the SQLAlchemy ORM and integration of the MealDB API. Made with custom CSS user interface and jQuery.

Frontend and Backend developer with committed entrepreneurial approach to growth and experience working independently. Takes pride in being versatile and adaptable with strong problem-solving and analytical skills. Excellent interpersonal skills. Team player who highly values flexible, collaborative culture. Highly motivated and self-driven. Strong focus on detail, performance and reliability.
